TOWEL BUCKETS

DAILY

SUPPLIES:

KAY® SolidSense™ Laundry Detergent

—OR—

KAY® QSR Power Pak Laundry Detergent (for restaurants with dispenser space constraints)

KAY® QSR Laundry Pre-Soak Plus Bleach (for soiled towel buckets)

KAY-5® Sanitizer/ Cleaner (for clean towel buckets)

Chlorine Test Strips

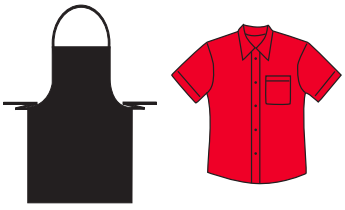

KAY® QSR Heavy Duty Degreaser Solution

Other supplies needed:
Clean Towel Bucket with Lid
Clean Soiled Towel Bucket with Lid
Laundry Handler

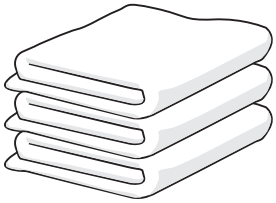

IMPORTANT: Pre-soak towels and grill cloths in a fresh, **lukewarm** Solution of Laundry Pre-Soak Plus Bleach. Wash towels and grill cloths **separately**. Load 70-80 half-sized towels or 20 grill cloths per single wash load.

APRONS AND UNIFORMS

- Only use SolidSense Laundry Detergent to wash aprons and uniforms; do not use Laundry Pre-Soak Plus Bleach as it can discolor or stain aprons and uniforms

TOWELS AND GRILL CLOTHS

- Laundry Pre-Soak Plus Bleach contains bleach; for towel and grill cloth use only

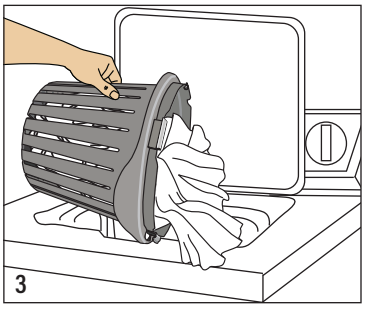

BEFORE CLEANING

- Dissolve 1 Pre-Soak sachet in soiled towel bucket and fill with **lukewarm** (75-90°F) water to bucket fill-line; use dry hands when placing pre-soak sachet into bucket; place laundry handler inside soiled towel bucket
- Shake out any food particles or loose soil from towels or grill cloths into trash can before placing them into soiled towel bucket
- Always pre-soak towels and grill cloths in a soiled towel bucket with laundry handler filled with fresh **lukewarm** (75-90°F) Laundry Pre-Soak Plus Bleach Solution
- Allow to soak until time to wash; for best results, soak towels for 4 hours
  NOTE: Do not use Laundry Pre-Soak Plus Bleach with aprons or uniforms

- Lift Laundry Handler from bucket to completely drain excess soiled Solution
- When draining is complete, empty soiled towels or grill cloths from laundry handler directly into washer
  NOTE: Separate towels and grill cloths; do not wash in same cycle

- Add soiled towels or grill cloths to washer following recommended load sizes:
  - 70-80 towels per single load
  - 20 grill cloths per single load
- Empty soiled Solution from soiled towel bucket into mop sink; **DO NOT EMPTY INTO WASHER**
- Set temperature setting on HOT/COLD, cycle dial on NORMAL, water level on MEDIUM
  NOTE: Water temperature must be at least 120°F

TOWEL BUCKETS (CONTINUED)

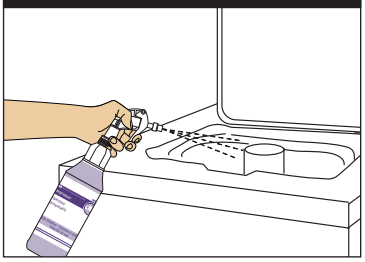

DAILY

LAUNDERING with SolidSense™ SYSTEM

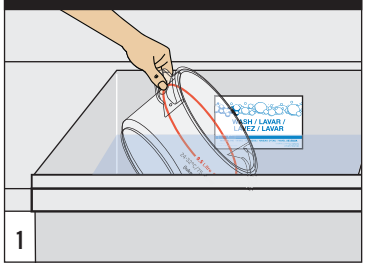

- Close washer lid; start washer and press DISPENSE button on controller to automatically add product
  NOTE: Do not use Laundry Pre-Soak Plus Bleach when washing aprons and uniforms
- Run wash cycle
  NOTE: Place one Power Pak Laundry Detergent sachet into wash tub if SolidSense System is not available

AS NEEDED

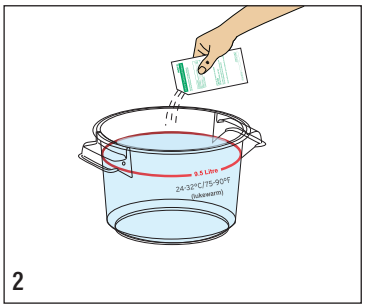

- With laundry machine empty, spray machine interior with Degreaser Solution and wipe with a clean, sanitizer-soaked towel to remove grease buildup
- Discard towel into the soiled towel bucket after use

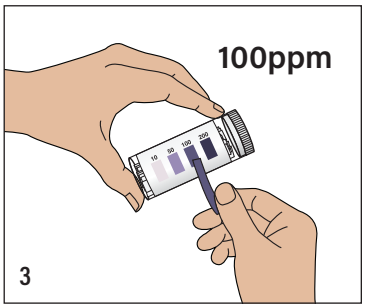

SANITIZER-SOAKED TOWEL STORAGE

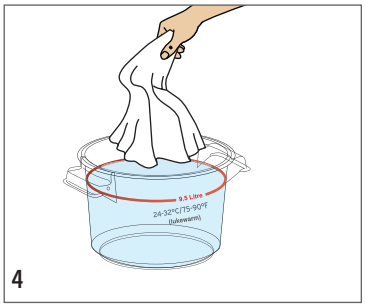

- Clean each used towel bucket and laundry handler at 3-compartment sink in **hot** (110-120°F) APSC Solution daily

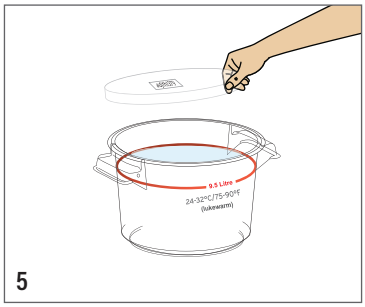

- Dissolve 1 packet of KAY-5 Sanitizer/ Cleaner in 2.5 gal. (9.5 L) of **lukewarm** (75-90°F) water in the clean towel bucket
- Mix thoroughly in Clean Towel Bucket until dissolved

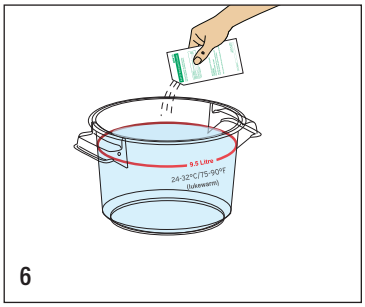

- Test concentration of Sanitizer Solution; concentration of freshly prepared KAY-5 Sanitizer Solution should be 100 ppm
  NOTE: Every 2 hours check concentration with a Chlorine Test Strip to ensure 100 ppm; if Solution is below 50 ppm, make another Solution and retest

- Place freshly washed towels in Sanitizer Solution
  Maximum 30 clean towels
  -OR-
  Maximum 20 clean grill cloths per bucket

- Cover bucket with lid
- Label clean towel bucket with 2-hour food rotation label
  NOTE: PPM level should be checked every two hours

- Prepare fresh Solution as necessary
- Change Solution if it becomes dirty, when a new load of towels is added to the bucket, or if concentration of Solution drops below 50 ppm
