SURFACE CLEANING AND DISINFECTING

THROUGHOUT DAY/DAILY

SUPPLIES:

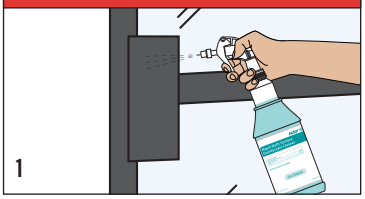

KAY® Rapid Multi Surface Disinfectant Cleaner Solution

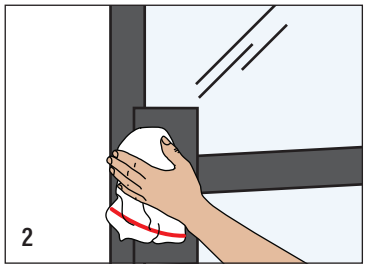

Clean Sanitizer-Soaked Towels

IMPORTANT: Use Rapid MSDC Solution along with a clean, sanitizer-soaked towel throughout the day for high touch point surfaces. Disinfecting should take place each day at closing or end of day, allowing the Rapid MSDC Solution to sit on each surface for 30 seconds.

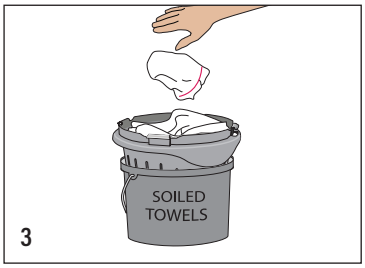

THROUGHOUT DAY—HIGH TOUCH POINT AREAS

- Spray high touch-point areas with Rapid MSDC Solution
- For cleaning touchscreen surfaces or surfaces near food or food packaging, spray Solution directly onto a clean, wrung-out, sanitizer-soaked towel (and away from food or packaging)
- See checklist on back page for all high touch-point areas; clean these surfaces throughout the day

- Wipe and clean surface thoroughly with a clean, wrung-out, sanitizer-soaked towel

- Once towel becomes visibly soiled, discard into the soiled towel bucket

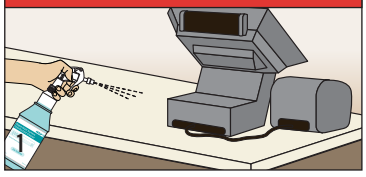

THROUGHOUT DAY—SHARED AREAS

- Clean and disinfect shared items between Crew member uses
- Use Rapid MSDC Solution and a clean, sanitizer-soaked towel to clean; allow Solution to sit on surface for 30 seconds or air dry

  NOTE: For electronics, DO NOT spray directly with Rapid MSDC Solution; spray onto a clean, wrung-out, sanitizer-soaked towel first, then wipe surface

DAILY AT CLOSE OR END OF DAY—DISINFECTING NON-FOOD CONTACT SURFACES

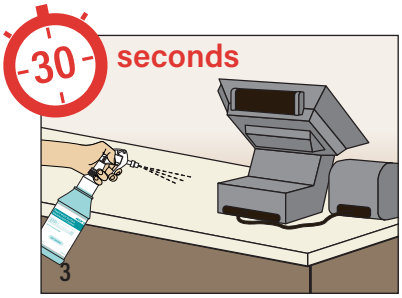

- Spray surface with Rapid MSDC Solution

  NOTE: When around food prep areas or cleaning touchscreens, spray Rapid MSDC Solution directly onto a clean, wrung-out, sanitizer-soaked towel

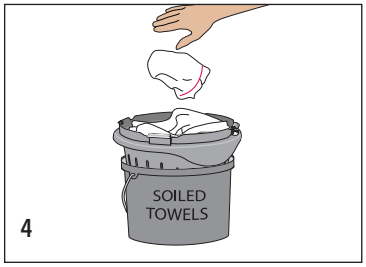

- Wipe and clean surface thoroughly with a clean, wrung-out, sanitizer-soaked towel to remove any heavy soils

- Spray surface again with Rapid MSDC Solution to fully cover and wet the surface with Solution
- Let sit for **30 seconds** or allow to air dry

  NOTE: If surface to be disinfected is **near food or food packaging** or for touch screens, spray Rapid MSDC Solution on towel (and away from food or food packaging). **Spray towel 3-4 times to wet towel with Solution and then use towel to fully cover entire surface with Solution**

- Once towel becomes visibly soiled, discard into the soiled towel bucket
