# MOFFAT® STAGING CABINET (CONTINUED)

DAILY/WEEKLY

**NOTE:** This procedure is for deliming the water tank and interior of staging cabinet. Always remove food product before cleaning.
**ALL LOCATIONS:** Perform this cleaning procedure after breakfast.

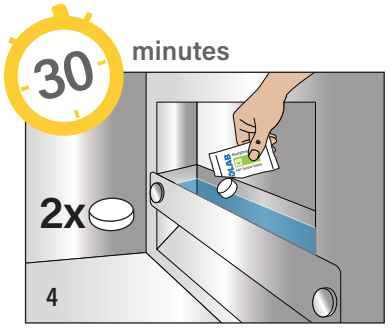

- Select WEEKLY CLEAN from display screen

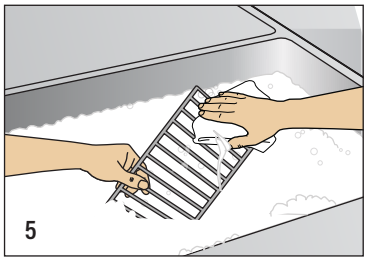

- Remove shelves; take to 3-compartment sink or warewash machine to wash, rinse and sanitize
  **NOTE:** Remove all food products from cabinet before cleaning

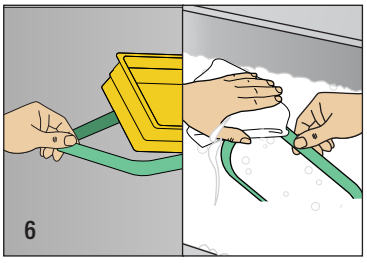

- With heat-resistant gloves, remove side racks from interior of cabinet; set aside
  **CAUTION: SURFACES WILL BE HOT**

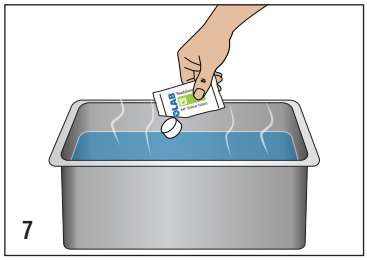

- Place 2 Delimer tablets into water tank inside cabinet
- Let soak for 30 minutes
  **NOTE:** Place up to 4 Delimer Tablets in water tank or utilize longer soaking time if severe limescale buildup occurs

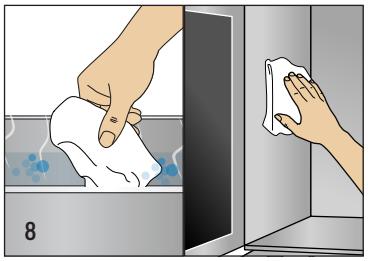

- While water tank is soaking, and after side racks are allowed to cool, take racks to 3-compartment sink to wash, rinse and sanitize
- Allow to air dry

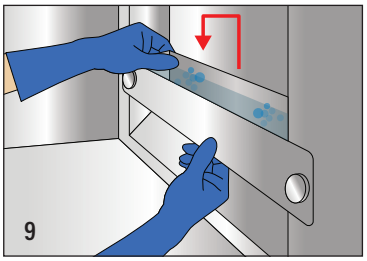

- Remove all colored insert bands from trays
- Wash, rinse and sanitize colored insert bands at 3-compartment sink with a towel only
- Allow to air dry
  **NOTE:** DO NOT wash colored bands in warewash machine

- At 3-compartment sink, prepare Delimer Solution in a clean container
- Place 1 Delimer Tablet into 20 oz of **hot** water; let dissolve
- Use Solution to wipe down interior of cabinet and remove hard water buildup

- Take container of Delimer Solution to cabinet
- Dip a clean, sanitizer-soaked towel into Delimer Solution; wipe down interior of cabinet
- Repeat if needed until hard water is removed

- Put on heat-resistant gloves
- After water tank is finished soaking, remove water tank from cabinet; take to 3-compartment sink to empty and rinse
  **IMPORTANT:** DO NOT leave water tank with Delimer Solution in cabinet; remove tank and discard Solution immediately after soaking
