- Select correct cleaning cycle **WEEKLY CLEAN** - 2 hour 34 minutes - use after cooking at temps above 350 °F
- Follow steps 5-10 above

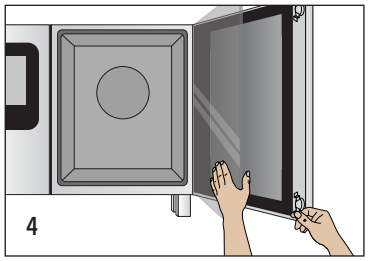

WARNING: OVEN MAY BE HOT

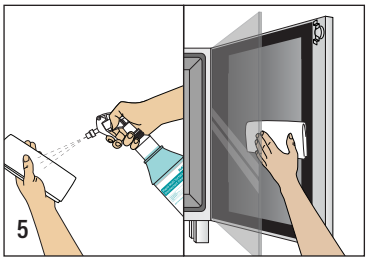

- Use a clean, sanitizer-soaked towel to clean drip tray at base of oven cavity
- Discard towel in soiled towel bucket

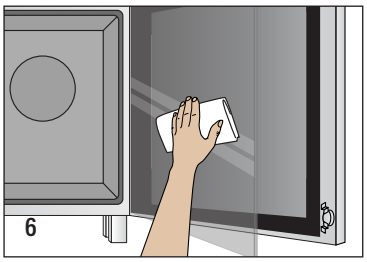

- Use a clean, sanitizer-soaked towel to clean drip tray in door
- Discard towel in soiled towel bucket

- Turn quick release catches on glass door to open

- Use a clean, sanitizer-soaked towel sprayed with Rapid MSDC Solution to clean between glass panels
- Discard towel in soiled towel bucket

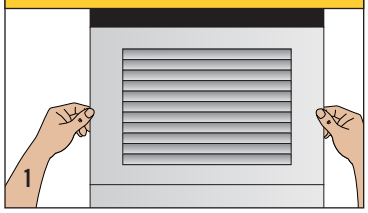

- Use a clean paper towel to dry glass, and discard paper towel

BI-ANNUAL CLEANING

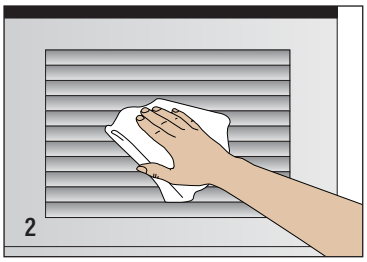

Ovens equipped with Hoodini Ventless system

NOTE: It is also important to clean the control filter twice a year; this is necessary for proper functioning of the oven

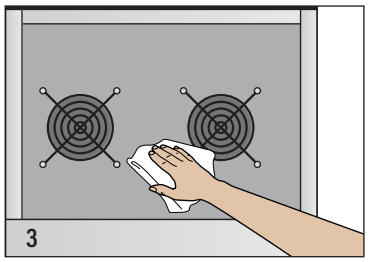

FRONT AIR INTAKE CLEANING

- Clean front air intake when oven and Hoodini are both off; it may take up to 10 minutes for Hoodini portion of unit to shut down after oven has been shut down
- Remove front grill; grip each side of grill on upper overhang of Hoodini and slide panel up and pull out

- Use a clean, sanitizer-soaked towel to wipe down each side to remove any accumulated grease and/or particulate
- Discard towel in soiled towel bucket

- Use a clean, sanitizer-soaked towel to wipe down each side of the grates over the three fans at front of unit
- Once clean, wipe with a clean paper towel
- Replace front grill; discard used paper towel
