Small Cup
Coffee Machine Brushes
Spout Brush

IMPORTANT: For 24-hour restaurants, clean during low volume periods. For equipment-specific procedures, please refer to the O&T PM manual. This procedure used for Taylor® and Manitowoc® equipment.

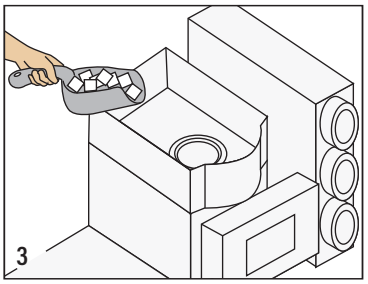

BLENDED ICE MACHINE—Daily

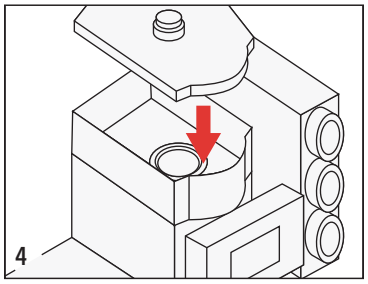

- Prepare a bucket of fresh KAY-5 Sanitizer/ Cleaner Solution
- Take Sanitizer Solution spray bottle, bucket of KAY-5 Sanitizer/Cleaner Solution and a clean 12 oz (355 ml) small **cold** cup to machine

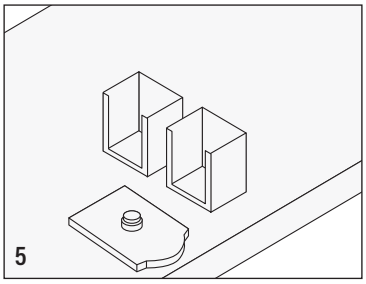

- Place blender pitcher in dispensing area to catch ice
- Remove ice hopper cover

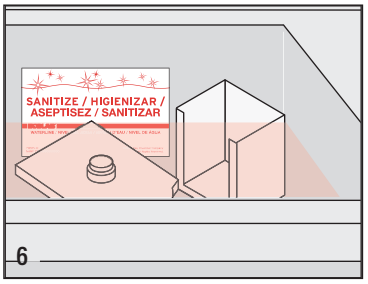

- Remove ice using ice scoop
  CAUTION: Shaver assembly blade is sharp; use CAUTION when removing ice close to shaver blade area
- Manually dispense ice into blender pitcher until all ice is removed from hopper

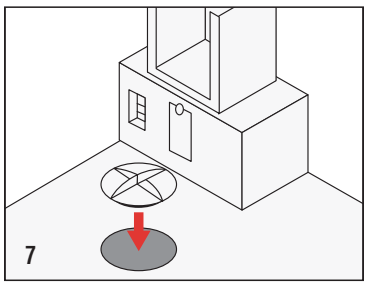

- Reinstall hopper cover; dispense all remaining ice
- Discard ice into back sink

- Disassemble removable parts such as blender pitchers, splash guards, ice chute, etc. (refer to equipment-specific PM card for detailed list of items that must be removed); remove rinse station assembly, pitcher drying station, lid holders, cabinet drip pan and whipped cream holder

- Take removable parts to 3-compartment sink or warewash machine; wash, rinse and sanitize
- Allow to air dry

For Taylor Blended Ice Machines: Install cover over whipped cream holder opening

BLENDED ICE MACHINE AND BLEND IN CUP (CONTINUED)

DAILY/EVERY 4 HOURS

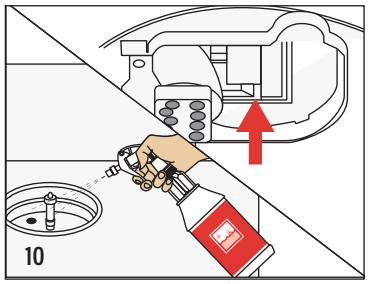

- Pour a small cup (12 oz) of fresh KAY-5 Sanitizer/Cleaner Solution from bucket of freshly prepared Sanitizer Solution into dispensing area and drain

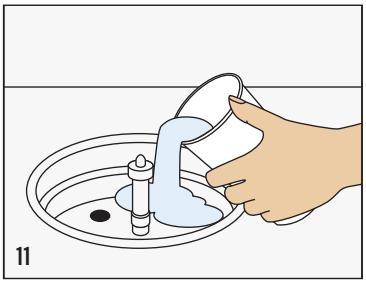

For Taylor Blended Ice Machines Only:

- Spray SolidSense Sanitizer Solution on dispensing head area; scrub with spout brush
- Dip spout brush into Sanitizer Solution bucket; brush dispenser head openings until clean

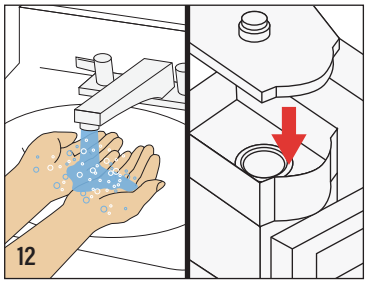

- Using Sanitizer Solution from KAY-5 Sanitizer/Cleaner bucket or SolidSense Sanitizer Solution spray bottle, sanitize shaver assembly blade, dispensing head area, rinser head and rinse station

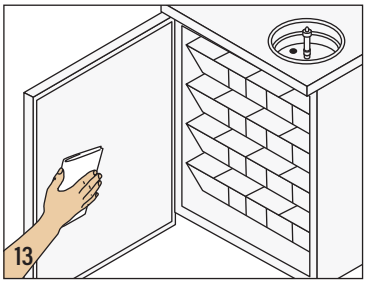

CAUTION: Shaver assembly blade is sharp

- Pour 12 oz of KAY-5 Sanitizer/Cleaner Solution into rinse station area and drain

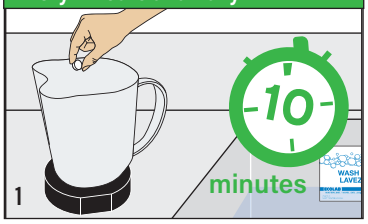

- Wash hands
- Reinstall all removable parts

- Wipe interior of refrigerated cabinet and gaskets, and exterior of machine and blend center with a clean sanitizer-soaked towel and Rapid MSDC Solution; discard towel into soiled towel bucket after use
- Rinse surface with a clean sanitizer-soaked towel; discard towel into soiled towel bucket after use
- Spray with SolidSense Sanitizer Solution and allow to air dry

For Taylor BIM: Wash, rinse and sanitize whipped cream holder cover; allow to air dry; reinstall whipped cream holder cover

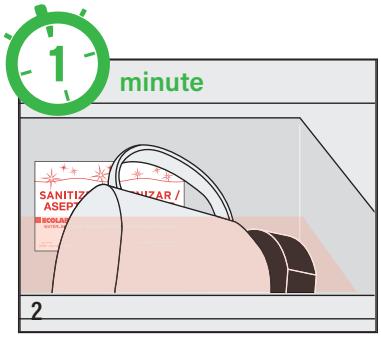

BLENDED ICE BLENDER PITCHER—Every 4 Hours and Daily

CAUTION: Blades are sharp; DO NOT place your hand into pitcher

- EVERY 4 HOURS, take blender pitcher to 3-compartment sink to wash, rinse and sanitize
- DAILY, take blender pitcher to 3-compartment sink; fill pitcher with **hot** (200 °F) water from **hot** water spigot at brewer
- Place one Beverage Equipment Cleaner tablet into pitcher; allow to soak 10 minutes

NOTE: For heavy soil, use 2 Beverage Equipment Cleaner tablets; if necessary scrub with a long-handled white brush

- Discard Solution; rinse and sanitize pitcher at 3-compartment sink or in a warewash machine
- Allow to air dry

CAUTION: Blades are sharp; DO NOT place your hand into pitcher

BLENDED ICE MACHINE AND BLEND IN CUP (CONTINUED)

DAILY/EVERY 4 HOURS

BLEND IN CUP CLEANING—Every 4 Hours and Daily

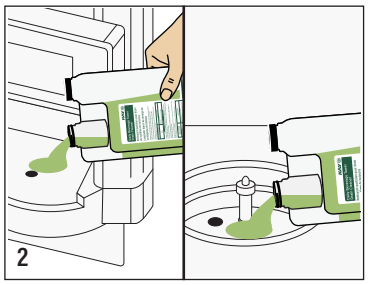

- Follow cleaning and sanitizing steps on BIC machine display screen
- Clean and sanitize spindle and food contact areas every 4 hours
- Spray with sink detergent; wipe with a clean, sanitizer-soaked towel
- Spray with Sanitizer Solution
- Allow to air dry

CLEAN DRAINS—Daily

- Loosen cap; squeeze bottle to fill dosing chamber with 1-2 oz of Daily Beverage Tower Drain Cleaner

For Taylor Blended Ice Machine:

- Remove cap and pour dose directly into BIM dispensing area drain
- Repeat dosing into BIM rinse station area drain; DO NOT flush with a water rinse

For Manitowoc Blended Ice Machine:

- Repeat step 1
- Remove cap and pour dose directly into rinse station area; DO NOT flush with a water rinse

For Blend In Cup:

- Repeat step 1
- Remove cap and pour dose directly into one of the rinse station area drains; repeat for the other two rinse drains; DO NOT flush with a water rinse
