Trash Bags (2)
Disposable Mask

Optional Supplies:
Ecolab Biohazard Spill Clean-Up Kit
WRIN 6323-101

KAY® Indoor/Outdoor Absorbent
WRIN 06762-000

The following procedure is used to clean up and disinfect any non-food spills in the restaurant or PlayPlace®. Examples of some non-food spills are vomit, feces, urine, nasal secretions, sputum or saliva. Although these spills are infrequent, they can happen, and must be cleaned up properly to protect customers and employees.

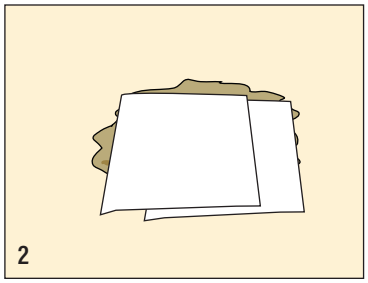

This procedure does not apply to soils or spills involving blood or other potentially infectious materials. If the spill is due to a traumatic event, accident, or involves blood, call 1-866-RECOVER for assistance.

NOTE: Follow local regulatory requirements that may require additional PPE such as disposable shoe covers, aprons, or absorbent material. If required, order the Ecolab Biohazard Spill Clean-Up Kit or KAY Indoor/Outdoor Absorbent through the DC.

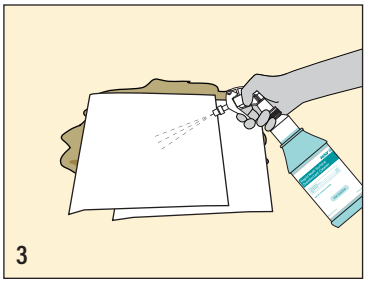

CLEANING AS NEEDED—For isolated and localized contamination Areas

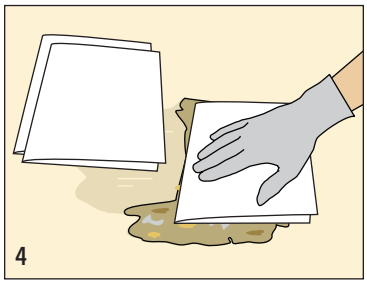

- Close or block off affected area, up to 25 feet in guest areas, using **CAUTION WET FLOOR** signs or safety cones until clean up procedure is completed and area is dry
- If non-food spill occurred in a food area, discard any open food or packaging items that may have been exposed; wash, rinse and sanitize any food equipment or utensils that may have been exposed

- Put on disposable gloves and disposable mask
- Place several paper towels (2 layers) over non-food spill to cover spill or cover with Indoor/Outdoor Absorbent

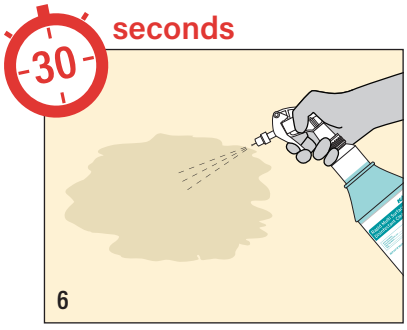

- Spray the spill thoroughly with Rapid MSDC Solution, until spill is completely covered

- Using additional, clean paper towels, clean up and pick up all of the non-food spill substance; do not use a mop to clean up spill

- Place soiled paper towels and non-food spill substance into trash bag
- Seal bag tightly by tying the bag in a knot; put this sealed trash bag into a second trash bag; do not seal outer trash bag at this point
- Remove gloves following disposable glove removal procedure below

- Wash hands following the hand hygiene procedure below; put on a new pair of disposable gloves
- Saturate cleaned area with Rapid MSDC Solution; let sit for 30 seconds

NON-FOOD ACCIDENT CLEAN UP AND DISINFECTING (CONTINUED)

Procedure for vomit, feces, urine, nasal secretions, sputum or saliva

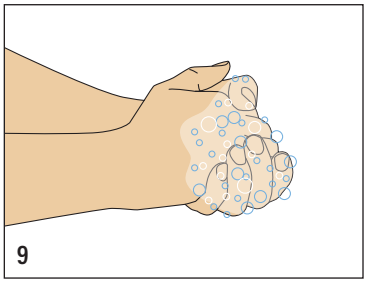

AS NEEDED

- Use paper towels to remove spill and Rapid MSDC Solution
- If necessary, use additional paper towels and Rapid MSDC Solution to clean up area; place paper towels into outer trash bag

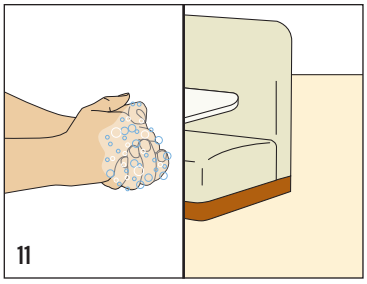

- Remove gloves, following disposable glove removal procedure below

- Thoroughly wash and sanitize hands following the hand hygiene procedure

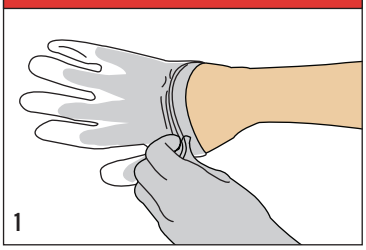

- Remove disposable mask and discard; place mask into outer trash bag; seal outer trash bag tightly by tying the top of bag in a knot
- Place sealed trash bag into a dumpster outside restaurant; DO NOT discard in an inside trash receptacle

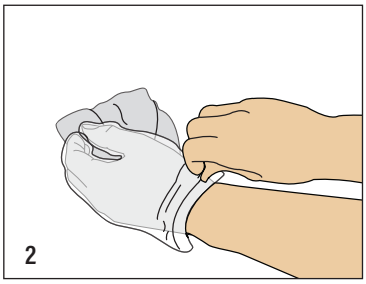

- Thoroughly wash and sanitize hands again before returning to other duties
- When soiled area has dried, remove **CAUTION WET FLOOR** signs or safety cones

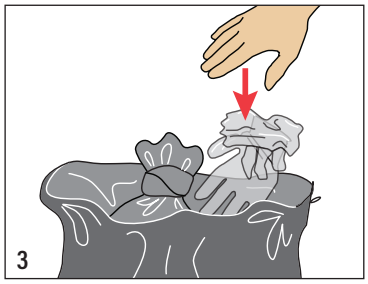

DISPOSABLE GLOVE REMOVAL

- Grasp outside of one glove at top of wrist, being careful not to touch bare skin
- Peel glove away from wrist to fingertips, turning glove inside out

- Hold glove you just removed in your gloved hand
- Peel off second glove in the same way, turning the glove inside out

- Discard gloves into outer trash bag
- Do not reuse the gloves
- Follow proper handwashing procedure after discarding

NON-FOOD ACCIDENT CLEAN UP AND DISINFECTING (CONTINUED)

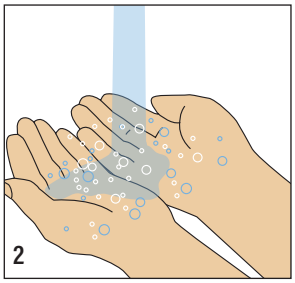

Procedure for vomit, feces, urine, nasal secretions, sputum or saliva

AS NEEDED

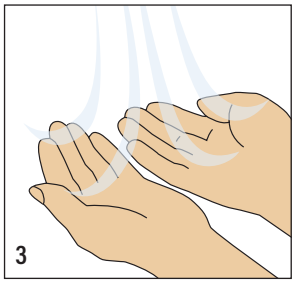

HAND HYGIENE PROCEDURE

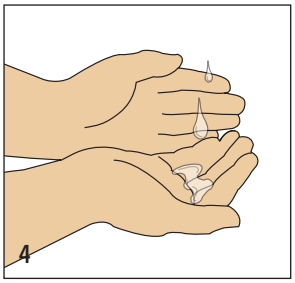

- Once hands are wet, dispense 1 application of Foaming Antibacterial Handwash or equivalent
- Rub hands together for 20 seconds; wash between fingers and around fingernails

- Thoroughly rinse under clean running warm water

- Dry hands using hand dryer or disposable towels
- Paper towels are preferred for use in production area, especially if there is only one hand washing sink; paper towels help to facilitate rapid hand drying; if a paper towel is used, use towel to turn off water before throwing it away; do not dry hands on pants or aprons

- Follow with Hand Sanitizer (Optional)
- Rub in well, paying special attention to areas around fingernails and between fingers; DO NOT WIPE OFF
