Simplified Breakfast – Equipment Best Practices

Receipt of Simplified Breakfast Equipment Checklist

- ❑ Upon equipment arrival, inspect for any signs of packaging damage, report to KES within 24 hours, and note on Bill Of Lading when signing for the shipment
- ❑ Review order packing list and make sure all boxes/items are accounted for
- ❑ Remove plastic coatings and packaging materials
- ❑ Inspect equipment itself for signs of damage
- ❑ Check for all accessories including stand off brackets, the condensation drawer, and quick connect water kit
- ❑ Check that the electrical supply cord is not damaged
- ❑ Look inside the cabinet to ensure the water tank is correctly located/positioned

Moffat Cabinet Installation – At A Glance

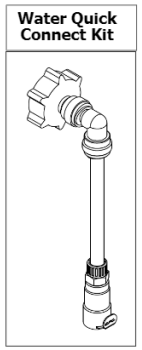

Moffat Cabinet Installation and Operations Manual

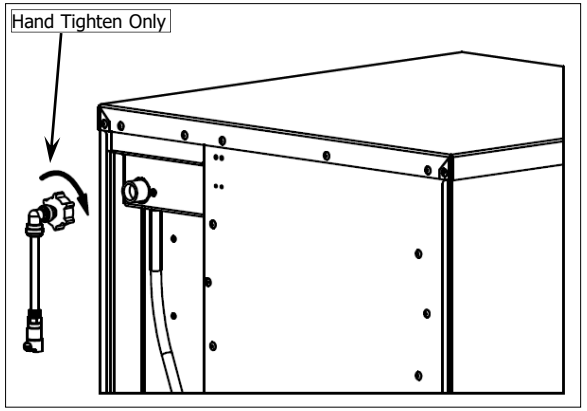

- **Clearances**
  - 1” Control Panel side / 2” other side / 6” including rear standoffs
  - Minimum 12” from sources of heat
  - When correctly positioned, lock front castors

- **Electrical Connection**
  - Moffat cabinet is pre-fitted with the appropriate cord set, NEMA L6 20A
  - The staging cabinet comes with a standard twist lock plug so if you are placing the cabinet in the prep line, an overhead drop cord and new pin & sleeve plug will be required. Please contact your KES to ensure these items are on order if needed
  - Make connection to protected power supply and isolation switch. The isolation switch must be readily accessible

- **Water Connection**
  - Utilizes a 3/8” Quick Connect Kit [included].
  - Connect cabinet to the pre-installed approved water filter and line
  - Pressure should be 30psi-80psi, minimum 1.5 GPM flow rate
  - Activate new filter installed by Coke, where applicable [instructions here]

Simplified Breakfast – Equipment Best Practices

Water Infrastructure Checklist

The Moffat Cabinet uses blended RO or filtered boosted water. Any existing issues with water systems will be exacerbated by the additional capacity requirements of Simplified Breakfast equipment. It is imperative to ensure water systems are fully operational, prior to launching.

- ❑ **Flush / activate filters prior to first use [applicable for restaurants without combi ovens]**
- ❑ **Ensure the quick water shutoffs [in the back of house by the water connection] and the quick connect going into the cabinet are turned on when ready for water to the cabinet**
- ❑ **Ensure no existing water pressure issues and/or system issues or outages with:**
  - ❑ **Water Treatment System (WTS)**
  - ❑ **Pre-Filter & Fine Filtration**
  - ❑ **Water Booster System (WBS)**
  - ❑ **Reverse Osmosis System (ROS)**
  - ❑ **Water Surge System (WSS)**
- ❑ **Review most recent QMC summary letter and address all outstanding issues that have already been identified**

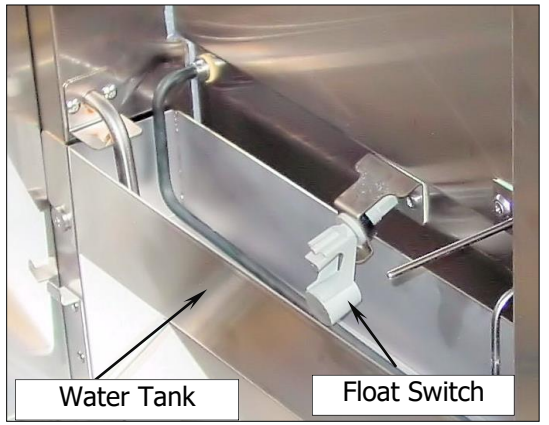

Important note:
Issues left unaddressed will most often first present symptoms in existing COMBI Ovens, as restaurants try to go-live on Simplified Breakfast. Restaurants experiencing COMBI issues should prioritize these actions.

Moffat Cabinet Start-up Best Practice Checklist:

- ❑ **Make sure the cabinet water supply is turned on and at correct flow rate of 1.5GPM. Make sure the valve is all the way open.**
- ❑ **Check that the water filter is not blocked or needing replacement**
- ❑ **Ensure the water tank is fitted properly on both studs. See video**
- ❑ **Check for free movement of the float switch**

Equipment Start-up Troubleshooting Guidance:

If the restaurant experiences issues related to:	Water Infrastructure or Error 9 – Water Tank Level Low	Electrical Connections or Controller Issues	Cabinet 'noise'
Leverage the troubleshooting guidance here, prior to calling service:	Scan QR or click here	Scan QR or click here	Scan QR or click here

For all other troubleshooting, please reference the technical troubleshooting guide.

If you do require service on the Moffat cabinet, call Moffat Service at 833-260-8427.
