CBT-MCD Details:
The Core Bun Toaster (CBT) features a stainless-steel belt for durability, reliability and minimum consumables. Cleaning and maintenance is easy to perform with a slide out drawer to access the belt. Capable of 22 second toasting, the CBT can run 1200+ perfect buns per hour to meet any store's peak hours.

Features: Toast core buns and breakfast items simultaneously, adjustable compression, adjustable speed control, adjustable temperature control, stainless steel belt for long term reliability, minimal low-cost consumables, sliding belt drawer for easy cleaning and maintenance, modular design for rapid servicing and troubleshooting, heated landing zones for core buns, gold quality toasting at only 455° (vs. over 550°), breakfast items are fed into UHC tray to minimize product handling, dual sided club toasting, compatible with single and three phase wiring to eliminate in-store electrical wiring, low energy consumption with high bun temperatures
